

MT BAKER VAPOR

BLUE LABEL JUICE

It seems like yesterday that MBV founders, James Thompson and Jesse Webb were bottling their signature E juice out of their tiny Bellingham apartment. Since those days, Mt Baker Vapor has experienced rapid growth, becoming an industry leader and a household name. Having prepared and shipped over 2.5 million orders to customers in over 150 countries and with a focus on delivering quality products, fast shipping and outstanding customer service, it's no wonder Mt Baker Vapor has become the number one choice for vapers worldwide.

Mt Baker Vapor's primary focus will always be customer driven. By providing quality, FDA compliant products at affordable prices, Mt Baker Vapor is able to maintain healthy relationships with its customers.

With that being said, in this effort to consistently meet and exceed our customers' expectations, as of November 4th, 2017, Mt Baker Vapor will focus exclusively on the "Blue Label" bottles in both 30ml and 240mL sizes.

Starting November 4th, 2017, per Section 905(i) of the FD&C Act, at the time of registration, all tobacco products must be submitted for product listing information. In keeping with FDA regulations and our core values, we will no longer sell our unfinished juice to our retail partners. Although we understand these changes may seem like an inconvenience, we at Mt Baker Vapor believe these changes will greatly benefit our retail partners in the long run.

WITH OUR "BLUE LABEL" BOTTLES ON YOUR SHELVES COMES ENDLESS OPPORTUNITIES TO SAVE AND ADD VALUE TO YOUR RETAIL STORE!!

Moving forward, you can expect to:

- Save extensive labor on the back end.
- Reduce overhead
- Carry FDA compliant bottles with the proper labeling and packaging.
- Gain access to 600,000+ customers by having your retail store listed on our site.
- Gain "Affiliate" status which guarantees you 10% of sales when your customers purchase product(s) from our site.
- Be able to continue serving your customers without having to be concerned with the FDA registration.
